### Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

### **DETAILED ACTION**

The applied Bardman'161 discloses all elements of the claimed invention. See column 2, lines 45-67, column 3, lines 1-67, column 4, lines 5-22, column 13, lines 12-50, column 14, lines 1-50, column 15, lines 1-15.

### ***Claim Rejections - 35 USC § 103***

3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

4. Claims 1-10 are rejected under 35 U.S.C. 103(a) as being unpatentable over Bardman'161.

The applied Bardman'161 teaches all elements of the claimed invention as in the rejection above.

The applied Bardman'161 discloses all elements of the claimed invention. See column 2, lines 45-67, column 3, lines 1-67, column 4, lines 5-22, column 13, lines 12-50, column 14, lines 1-50, column 15, lines 1-15.

The Bardman'161 does not specifically teach the limitations of claims 4,5,9,10 and does not states that composite particle may comprise encapsulated particles in aqueous dispersion .

However, it would have been obvious to one having ordinary skill in the art at the time of the invention was made to use the teaching of Bardman'161 and suspend such particles in aqueous dispersion, and vary the weight ratio of polymer particles and combine polymer weight, since it has been held that where the general conditions of a claim are disclosed in the prior art, discovering the optimum or workable ranges involves only routine skill in the art. In re Aller, 105 USPQ 233.

The amendments and remarks filed by applicants in their last response have been fully considered. The arguments have not been persuasive in view of the new grounds of rejections. The claims remain unpatentable.
